

POP N' POKER

How To Play

To begin play, the player must select from 5 to 10 numbers on the playing card. The player may select Quick Pick to have the numbers randomly selected.

The player must press the "Complete Selection" button after selecting the numbers.

1 to 10 game cards can be played each Drawing. The "Quick Pick All" button can be pressed to have the numbers for all 10 game cards randomly selected.

As the drawing occurs, all of the numbers (1-52) are assigned a different Playing Card (Standard 52 card deck). This is based on the order in which the playing cards (balls) are selected.

For example, if the 1st ball selected is the Ten of Spades, then the Number 1 is assigned the 10 of Spades.

At the end of the drawing all of the Numbers selected on the Playing Card are assigned the corresponding Playing Cards, and the best 5 Card Poker Hand is determined.

Winning 5 Card Poker Hands are determined according to the following Pay Table:
